

Andrei Eroshenkov (18 y.o.)

Full-stack developer

Motivated developer with solid programming fundamentals and broad interests in web, mobile, backend technologies and AI. Gained practical C# experience during a project-based internship at Levi9. Fast learner with strong problem-solving skills demonstrated through projects and hackathons.

Skills

- **Programming:** C#, Python, JavaScript, TypeScript, SQL
- **Frameworks & Tools:** .NET, React, React Native, Next.js, Git, Supabase
- **Core Knowledge:** OOP, Algorithms, Data Structures, REST API, Databases
- **Languages:** Russian (native), Serbian, English (C1 - IELTS Academic 7.0)

Work Experience

- **Levi9 High School Internship:** Participated in a project-based (C#, Git) internship, working in a team of interns under mentor supervision and gaining direct exposure to how professional software development is organized inside an IT company.

Projects and Achievements

- **Intruct** - An AI-Powered EdTech mobile app that generates structured courses from raw text material using AI model GLM 4.7.
Received a Special Award "Power of Innovation - Igor Osmokrović" on Regional App Challenge 9
Stack: React Native, TS, Go (Backend), N8N
- **Learn&Share** - mobile app for peer-to-peer skill sharing, with calls in it.
Winner of the "Regional App Challenge 8" hackathon on Serbian and Regional (Serbia, Montenegro and Bosnia and Herzegovina) levels.
Stack: React Native, TS, Go (Backend), LiveKit (online calls)
- **DocTalkie** - a small service that lets you add an AI assistant with contacts about your project to your website, using a small NPM package. Was made on Next.js AI hackathon
Stack: Next.js, Supabase, TS.

Education

- Specialized IT Department in Gymnasium "Jovan Jovanović Zmaj", Novi Sad, Serbia 2022 – Present (Graduating June 2026)

Personal Qualities

- Always open to new technologies and self-improvement
- Interested in continuous self-improvement and solving real-world challenges
